

Klaviyo Data Science Podcast EP 37 | How research works (part 1)

Author: Michael Lawson

Claps: 13

Date: Jul 17

Research is a core part of data science. But data science is far from alone in that respect – other fields rely on research just as heavily, and they have their own set of hypotheses, methods, complications, and concerns. This month, we talk to three Klaviyos about research they did before joining the team – from astronomy research into tiny iron meteorites to mechanical engineering research about oscillations – and how it prepared them for the research they do now.

You can listen to the full episode [on Spotify](#), or see more details (along with the other 35 episodes) on our [podcast blog](#).

Klaviyo Data Science Podcast EP 37 | How research works (part 1) by Klaviyo Data Science Podcast

Welcome back to the Klaviyo Data Science podcast! This episode, we dive into... Research is a core part of data!
