

Klaviyo Data Science Podcast EP 38 | Production 101

Author: Michael Lawson

Claps: 1

Date: Aug 17

Experienced software engineers reading this blog are likely no strangers to the concepts of writing production code, deploying to production, and working carefully with a production environment. This episode, we tackle this topic from a slightly distinct lens: how should data scientists working on data science features think about production, and how should people new to production learn best practices that will make them effective with whatever production environments they eventually need to work with?

You can listen to the full episode [on Spotify](#), or see more details (along with the other 37 episodes) on our [podcast blog](#).
