

# Klaviyo Data Science Podcast EP 39 | Are You Going to Science Fair?

Author: Michael Lawson

Claps: 6

Date: Sep 18

Presenting technical work is not something you automatically learn how to do – just like the technical skills themselves, it has to be learned and practiced, and opportunities to practice it can be hard to find. This episode, we discuss one opportunity that Klaviyo put together for its R&D teams this summer: the Klaviyo R&D Science Fair. Listen along to hear about:

- How, much like software development, explaining technical work is an iterative process
- The best ways to engage a crowd and get them interested in what you have to say
- The unique and powerful allure of scissors and glue guns

You can listen to the full episode [on Spotify](#), or see more details, including photos from the event, on our [podcast blog](#).
